

SP 336 (State School no 336), set up in 1991, is a large, well-known and successful school, with 772 pupils attending the place. The premises are located by Natolin underground station in a modern part of Ursynów District, which is only a 20-minute distance (by tube) from the centre of the city. Apart from general classes, the school offers sports classes specializing in handball and athletics.

The knowledge of our pupils can serve as a proof to the excellent quality of education we provide.

We have been awarded in regional, Warsaw and national knowledge competitions. The pupils have also been the winners in a variety of sports tournaments.

The impressive range of extra-curricular activities is constantly changing and currently includes: computer studies, maths, technology, dance, drama, art, music (school choir), English, handball, volleyball, football, gymnastics, minihockey and athletics.

We volunteer in social welfare activities shaping children's sensitivity.

Furthermore, we promote patriotic education and cultivate Polish traditions. We serve in remembrance of national events and take care of national memorial places, too.

In addition, we are an initiator and a supporter of ecological activity, putting focus on ecology, environment, nature and the beauty of our school's surroundings as well as its neighbourhood.

Last but not least, we share our professional experience, cultural traditions, customs and knowledge with other countries. We were awarded for partaking in the Comenius Project which was held in cooperation with Belgium, Germany, Great Britain and Ireland. We are currently involved in the eTwinning project.

If you would like to know more about the work of our pupils and teachers, or would consider cooperation with us as well as exchange professional experience, do not hesitate to contact us.
